CICS Green Belt Class Agenda and Timing Starting April 20, 2023

Note: Course format has been changed to 2 days every 3 weeks to focus on the topics learned in class and balance existing work responsibilities. Use of a laptop is required to participate in course content. Some loaner laptops available through previous arrangement with the instructor.

Included in the course:

- 10 days of Six Sigma Green Belt **training** with project **coaching**
- Electronic copies of all course content and templates used in the training
- Hands-on exercises and simulations to help reinforce principles learned
- ROI from training **projects** that drive results.
 - We target a \$50K hard savings for a project.
Check out the CICS Double Performance Guarantee at the end.

Software: Minitab or QI Macros, an Excel add-in, can be used.

QI Macros (permanent license)

2-9 copies \$299 per copy or market price at the time.

Minitab - special training license available

Our Learn-and-do approach builds practitioners who think and act like owners. To make the most of the experience, here are some recommendations for participants:

- **Have a goal.** Know what project you're working on the first day of training. We'll be happy to discuss what makes a good GB project and help scope it appropriately.
- **Set Up a No-dithering Zone.** Team up 2 or more people on the same project to go through the training. That way the project moves forward and the learners have a partner for mutual accountability, rather than "**dithering**," and doing nothing, due to uncertainty. Plus, when someone is out of the office, the project can still progress.
- **Pay me now or pay me later.** Your project will consume around 4 hours per week of your time throughout training. Or, it will take most of 2 or 3 weeks before the report-out. Your choice.

With our Learn-and-do approach, we build practitioners who think and act like owners.

Class Schedule

Session 1 April 20-21	2 days	GB Days 1-2 – Define Project Selection. Creating a project charter. Basic Statistics. Next Steps
Coaching 1	1.5 hours per project team	Coaching 1 – How Do I Start My Project?
Session 2 May 11-12	2 days	GB Days 3-4 – Measure SIPOC and mind mapping. Process mapping. Graphical methods of data analysis
Session 3 June 1-2	2 days	GB Days 5-6 – Measure and Analyze Operational Definitions. Teaming. Managing Change. Attribute MSA and Variable MSA. Process Capability.
Coaching 2	1.5 hours per project team	Coaching 2 – I’ve Got Data, Now What?
Session 4 June 29-30	2 days	GB Days 7-8 – Analyze and Improve Root Cause Analysis. Lean Overview. 5S. Value of Speed. Lean Daily Management.
Session 5 July 12-13	2 days	GB Days 9-10 – Improve and Control TPM and OEE. Kaizen. SPC. Implementing solutions. Control Plans
Coaching 3	1.5 hours per project team	Coaching 3 – How Do I Close My Project?
Report-out July 27, 2023	½ day	Milestone report-out to leadership 20–30 minute presentation to leaders on project and results to date.

What to Expect With Project Coaching

It is a 1.5 hour meeting about YOUR project. It can be virtual or onsite, and helps drive your project through DMAIC without missing any steps. There are 3 coaching sessions included in the course. Others are available. This is the secret sauce for building practitioners and completing projects that drive real ROI for the organization from the first project.

The CICS Difference. We offer a double performance guarantee on training. NOBODY else guarantees training performance. You can Google it yourself.

Simply put: If you’re not completely satisfied with the results of the training and projects, CICS will work with your project teams until they generate savings equal to 2 times the cost of training.
Guaranteed.**

** We can’t afford lawyers to get us out of delivering on our promises. So it’s just easier all-around for everybody if we give you what you need most, practitioners who can drive projects and deliver results.
Guaranteed.
